

I graduated from two courses organised by Vilnius Coding school since I am seeking to retrain as a web developer. As much as I enjoy expanding my knowledge by watching endless youtube videos, I am more than eager to master all those best practices that comes with... well... practice.

### Skills

- I feel comfortable working with **HTML** and **CSS**.

- I am getting more and more friendly with **JavaScript**.

- I have some knowledge of **PHP**. In PHP Academy course I used Laravel for my graduation project.

- As you read this CV I am most likely watching videos on **React**.

Some of the tools and technologies I have been working with

### Before retraining...

Since my high school graduation in 2008 I have been freelancing as a photographer and videographer. For this reason I opened my own company E. Briedytės ĮTema in 2013. 2013-2021 I was the owner of regional news website temainfo.lt. I was writing articles, creating photo and video content, administrating the website itself.
